To: Staff and Students of Maxwell and Settembrini

#### LEONARDO EXCHANGES IN MARCH 2007

There were exchange periods for 3 students and 2 teachers in March on this year. Students were 3 weeks in local companies in Milan area and teachers were 1 week in schools. Both, students and teachers came from Vantaa Vocational College Varia's technical department and they presented team of Metal Field.

Their visits were very pleasant. The companies were very good with excellent facilities and really high class staff. Programmes done by companies were very nice and those met tasks of students' curriculum very well. Also a support during periods was organized very well together with teachers from Maxwell and Settembrini. Students felt themselves very welcomed to companies.

Students were accommodated part of period in families. This experience was very nice and students were very impressed about hospitality of Italian families. Time in families was very nice and warm and it gave very safety feeling in much bigger city than the students were from.

I would like to thank all of you for your hospitality and warmth you showed your students and teachers. We appreciate it very much. I can say Italy - Milan has many new friends in Vantaa nowadays. Especially we would like to thank Maria Giovanna Musarra, Maria Teresa Trabucchi and Maria Grazia Cupini whom made this project possible.

I wish you very nice springtime and good holidays in summer.

Yours sincerely,

Juha-Ville Mäkinen  
Coordinator of international projects
